7-13-2011 – 5-5-2015

After my **bladder cancer operation in 08/04**, I began taking Poly-MVA.

Since that time I have been going back to the V.A. Hospital every 3 months for observation. I underwent ten B.C.G treatments, but **I also took Poly-MVA and vitamins and minerals.**

I have always been **active and I still am.** Several months ago during my exam the **doctor stated that there was not even a scar where my tumor was removed.**

I am currently on a **maintenance dose of poly-MVA.** My wife also takes Poly-MVA.

Thanks,

Angelo

Spoke to Angelo and **his cancer is doing well....** tumor in bladder was not very deep. He will be doing more check ups. **Still shares the PMVA with his wife** and continues to use.

**5-5-2015**

Had a great talk with Angelo. **He is doing very well and is cancer free.** I also told him I would like to keep in touch and call him and update his testimonial. He said he was more than willing.
