I was diagnosed with bladder cancer in **February 2011**. I had a **tumor removed from my bladder in March 2011**. I started all alternative medical treatments in April 2011.

I have **been and continued to take poly-MVA**.

I recently had some **cancer cells in my urine**, so I had a biopsy and it came back negative for malignancy or dysplasia, with no deep muscle invasion. I underwent 6 weeks of BCG treatment which I just completed.

I will continue to take poly-MVA because I feel it has helped me. I was originally told I would need to have my bladder removed.

As of today, **2 years later, I still have my bladder!**

Thank you,

Dr. Carl F. Gugino

5-13-2015

Dr Gugino had surgery and **refused any further targeted therapies**. He went to Hope For Cancer where **Poly was part of his treatment protocol**. He has been **on Poly ever since and is now over 3 years cancer free** and continues to take 1 tsp daily. He is 86 years old and continues to do some international teaching and is flying to Japan for 3 weeks as of next week. He and his wife come out to Rancho La Puerta everything Thanksgiving.

6-10-16

Dr. Gugino is traveling a lot. He is on his way to Japan. **Doing well.**

1-14-2017

Doctor is still taking daily **maintenance dose**.
