### **5 Updates**

7-29-08 – 9-13-09 - 10-08-09

5-06-11 - 1-22-13

My brother, Larry, was diagnosed with **Multiple Myeloma in November 2005** and in researching for answers for support of his body, **our family was led to Poly-MVA**. He is currently taking **Revlemed** and **Poly-MVA** and **his numbers are improving**. I consider myself a "Cancer Conqueror," **being 6 years cancer-free from colon cancer** in May 2006. **I decided to take Poly-MVA for daily support** and as a preventative measure.

**My energy is great, I feel wonderful and I am using Poly-MVA** to support continued health. I appreciate AMARC Enterprises and the wonderful work they are doing to support people facing various health challenges; they are always friendly and supportive. I especially appreciate Dr. Llamas and his willingness to answer all my questions. His kind supportive words have been most helpful. Thank you!!

**Marilyn Watts**

**7-29-2008**

Marilyn shared Larry Cunningham's latest labs and said he is **now off of all chemotherapy agents** and continues to be **faithful with the Poly MVA**. He is doing very well. She is grateful for all of the support.

**9-13-2009**

My brother has **faithfully taken the Poly-MVA** since my last report. His **M Spike Protein continued to drop while on the Poly-MVA** and **finally reached 0** on 01-07-08 and **has remained at that level since that time**. He no longer requires chemotherapy and is doing very well.

He continues his **use of Poly-MVA**. My husband and I continue taking it as a preventative measure. My husband was diagnosed with Prostate Cancer with a Gleason Score of 8 (March 2007). The doctor wanted to perform surgery, however, we opted to continue with a **holistic approach including Poly MVA and other natural methods**. He is doing very well - has lots of energy, **is able to work full time and enjoy life**, with **NONE of the side effects** common with traditional medical procedures (incontinence, impotence, etc.)

Dr. Llamas has been most helpful in our journey to wellness and **we are very thankful for him and the entire staff at AMARC**. Thank you for all your support and for making Poly-MVA available.

Marilyn Watts

**10-08-2009**

I personally believe that the **Poly MVA is a major contributor to his remission**. He did complete the chemotherapy treatment (Velcade & Revlimed) and he believes they were a part of his healing, however, my understanding has been that many Multiple Myeloma patients frequently bring the M-Spike protein down to zero **and then it goes back up in a short time requiring further treatment with chemo**. So far **Larry is maintaining those levels** and I **attribute that to Poly MVA**. He has **not required any further treatment with chemo**.

Marilyn

**5-06-2011**

Marilyn says Larry has **stopped using Poly due to the cost...**for a short time. He will go back on it some time as there has been a spike in his counts. She said it is hard to say what would have caused his remission, but **he may soon be using Poly-MVA again.**

**1-22-2013**

Ms. Watts called in regard to her husband Mort Watts. **He had stopped using PMVA** as he went to try alternative therapies at this time. She currently has no updates. Her brother **Larry Cunningham was also using Poly MVA** but has recently undergone a stem cell transplant.
