I had a **terrible diagnosis of stage 4 Ovarian cancer** in **January of 2007**. If I had done the chemotherapy the doctors had recommended, they **couldn't have guaranteed that I'd still be here nearly two years later**. Not only am I here, but Praise God! **I'm still gaining** and intend on sticking around for good.

Your support has been **critical in my journey to good health**. It has given me the physical support I needed while I fed myself on the Word of God regarding healing and fought the good fight of faith.

Every day I fill my spirit with the Word of God and **take my Poly-MVA**. I **don't intend to ever let my guard down again!**

I believe that **Poly-MVA has done only good to my body**. We're thankful that you were here when we needed you. Keep up the good work.

Sincerely,

Mary

4-11-2008

Mary was **diagnosed** early last year **with stage IV Ovarian Cancer** and only had surgery. She has **refused any other conventional treatments** and has only been doing **4 tsp daily of Poly MVA** for the last year. Her CA-125 was dropping from 30 to 16 but is now going **back up to 32**. So, she has recently **increased her dose of Poly to 8 tsp**.

5-28-2008

Due to the recent elevation in her CA-125 marker, Mary has **started taking 8 tsp of Poly MVA 2 times a day(16 tsp daily)** but it upset her stomach. She has now broken up the dosing into **4 times a day, at 4 tsp per dose**, and is taking food with each dose.

11-12-2008

Spoke to Mary and she is excited that her **CA-125 test has stopped rising** and has dropped from **32, back in early April, to 30 a few months ago** and is now **down to 22** as of **November**.

9-11-2009

Talked to Mary and **she is doing very well**. She and her husband own a camp ground and have been very busy. Mary will have a **cat scan done at the beginning of October for her six month check up**. She is still taking 8 teaspoon per day.

8-02-2011

Spoke to Mary and she is **doing really well**. She had **tests last month** and **everything came back clean**. She was telling me that NH is fighting to make insurances cover alternative doctors and meds. She said they should know sometime in Sept. if it passed or not.

1-31-2013

Spoke to Mary and her **CA-125 markers are still in the normal range**. She thanked me for checking in on her.

2-25-2016

Finally talked to Mary again and **she is doing wonderful with no problems**.
